		Invasion Games (football, basketball, netball, tag rugby) Students will become increasingly aware of how simple tactics can be applied to activities. They will learn to apply basic principles of attack (penetration, support, width, mobility, and creativity) and defense (pressure, delay, depth, compactness, patience and predictability). They will be taught to communicate and collaborate with increasing confidence whilst taking part in activities and apply

They will apply their fundamental movement skills in activities including grip, serving, overhead and underarm shots, net play and smash shots.</p> <p>Striking and fielding games (cricket, rounders) Students will become increasingly aware of how simple tactics of how to score runs (accurately hit the ball, avoid getting out) and how to stop the opposition scoring runs (making hitting difficult, get the batter out) can be applied to activities. They will learn to communicate and collaborate with increasing confidence whilst taking part in activities and apply their fundamental movement skills including the batting skills of grip, stance and footwork, bowling skills of grip, delivery and follow through, and fielding skills of stopping and returning, and catching.</p> <p>Health & Fitness & Running activities Students will be taught to exercise safely and effectively to improve health and wellbeing and an increasing awareness about why it is important to exercise regularly and live a healthy lifestyle. They will experience a variety of methods of training including circuit, HITT, interval, continuous and fartlek. They will be introduced to the components of fitness including cardiovascular fitness, strength, muscular endurance and learn to plan their own and others training using the principles of training including specificity, progressive overload, FITT and thresholds of training.</p> <p>Athletics Students will be taught to apply their fundamental movement skills in relation to running (starts, posture, pacing, leg and arm action, coordination of legs and arms and stride pattern), jumping (run-up, take-off, flight and landing) and throwing (grip, preparation, movement and release), and how to apply these skills in both track and field events becoming increasingly competent and confident.</p> <p>Dance In dance students will be taught to perform dances using dance techniques including travel, balance, turning, jumps and motifs in order to explore ideas, concepts and emotions with increasing competence and confidence.</p> <p>All activities In all activities students will be given the opportunity to compare performances and recognise a good performance. Using this information they will make suggestions of how to improve their own and others' performance. They will learn to show confidence in some situations when leading small groups, develop confidence and interest in a range of physical activities and an awareness about why it is important to exercise regularly and live a healthy lifestyle.</p>
